

# MAP PARCEL APPLICATION HELP DOCUMENT

**This help document provides an overview of the tools available for this MAP Parcel Application. This overview is extracted from the manual to aide users in navigating around this interactive map.**

## Tool Bar

Search Menu

Zoom-In Tool

Identify

Print

Overview Map

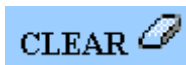

Zoom-Out Tool

Previous Extent

Pan

Clear Button

Reset Button

The first set of these tools is located on the bottom page of the application. They include the following tools/buttons:

**Search Menu Button** – This button gives you the four available Search Menus found in the MAP Parcel Application.

**Overview Map Button** – This button gives you an overview map, and places a box over your current location in the Map View Frame.

**Zoom-In Tool** – Allows you to zoom in on the Map display. By using the left mouse button, and clicking anywhere on the Map, draw a box around the area that you want to zoom-in on. Notice the map will change.

**Zoom-Out Tool** – Allows you to zoom-out in the Map display. Similar to the zoom-in tool, this button allows you to zoom-out at a specific area or define a box for your zoom-out scale.

**Previous Extent Tool** – Allows you to zoom to the previous extent of the Map display.

**Identify Tool** – Allows you to identify the attributes of the Parcel layer. Attributes include Block Number, Lot Number, Acres, Land Use, etc.

**The print button** - is used to print the current map frame along with the legend. This shows the current layout that the Interactive Map Application creates.

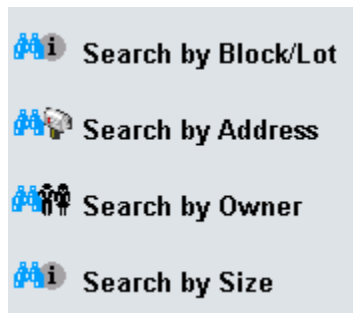

**Clear Button** – Clears all selected features

**Reset Button** – Brings your map to full extent

**The second set** of tools is located on the top left of the Map. These components allow the user to query specific attributes of the Map. Queries can range from block and lot to owner information. If they are not displayed already on your map, click on the Search Menu button (binoculars icon).

**Search by Block/Lot**

This tool allows you to query for a specific block and lot.

**Search by Address**

This button allows the user to type in a specific address.

NOTE: Addresses are only searchable if they meet an exact match contained in the parcel data, which is taken from the State's MOD4 parcel database. The correct input of the address is critical.

Search by Owner

This tool allows you to query for Owners of the property

Search by Size

This tool provides an acre range for the land use that you are querying.
